

NAPKIN

**P2 Group 5 - Gyatso Wolfs,
Laçin Felek, Mina Kaya**

How we started..

Why Dining Table/Area?

- It is a commonality in human history and culture regarding getting together and eating since it is closely associated with a basic need.
- Although common, it shows diversity in itself, and that pushes the individuality and the culture of the person on that given table as well as their individual life experiences and allows an outsider a more intimate view of the person in front of them.
- It is a great tool for people to find themselves as well as people who are similar to them and can make connections through it.
- Act of sharing personal archive

The Idea

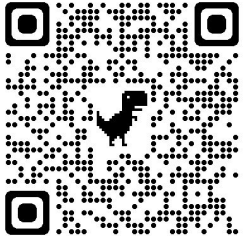

Find new people to enjoy food with!

Has It been done before?

Foodys

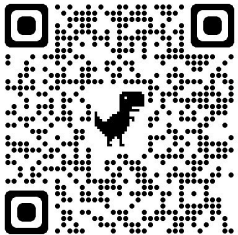

- EatWith

What differs us?

- The ones in person can be unsafe as they are predominantly in someone's house.
- It is not dependent on you being in an area in the world and by that it does not exclude the rest of the world as options to connect and people from participating.
- Allow a platform that allows more ways of connecting than one concept
- Can be used to commercial purposes such as the ingredients portion where people can purchase items from various places and sponsorships from content making.

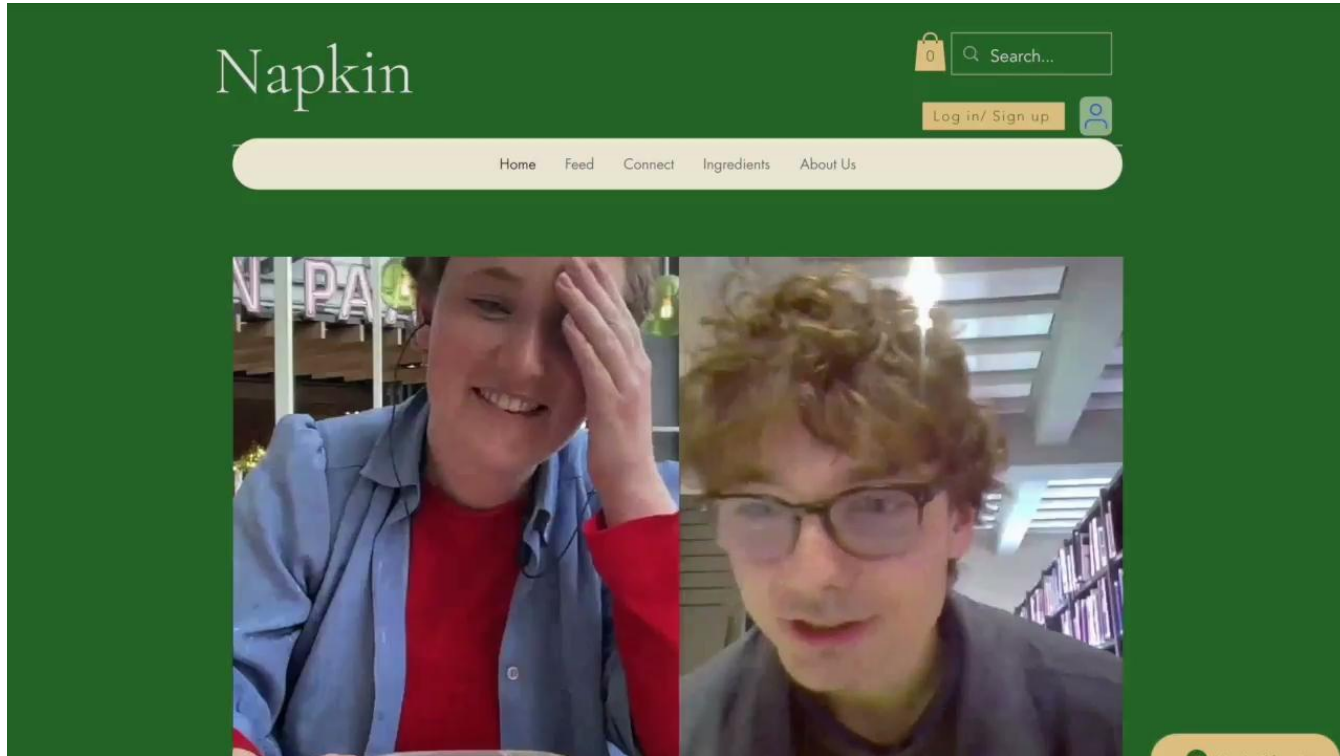

Presentation will continue through the website!

Tryout!

https://youtu.be/STpgej_HKwc

Future?

- To implement more original parts that can differ and enrich the platform.
- Allow more space for the user to engage and make the website and their feed personal.
- Have a proper domain and host.
- Make connections to supermarkets, markets and sellers.
- Implement a donations portion where people can buy groceries for others who need.
